## Professor Edward Lynch

PhD, Lond, MA, BDentSc, TCD, FDSRCSEd, FIADFE,  
FDSRCSLond, FASDA, FACD

## Professor Edward Lynch is back with an update on his latest clinical research

Professor Edward Lynch educates on the latest evidenced based methods to achieve better, faster, more effective and more profitable clinical dentistry!

It's never too early or too late to learn from a global dental leader. Whether you're a recent graduate with a desire to extend your practical knowledge, or an experienced oral health provider aiming for continuous improvement, do not miss this opportunity to learn from one of the dental fraternity's most highly regarded academics.

Professor Lynch completed a full term as the Head of Dentistry from 2010 in Warwick Dentistry at the University of Warwick, which ranks in the top three Universities (2011) in the UK.

Professor Lynch is currently Course Director of Dentistry at the University of Warwick. Elected the most influential person in UK Dentistry in 2010 by his peers (Google dentistry top 50 vote 2010 result), he has held the position of Professor of Restorative Dentistry and Gerodontology at the Queen's University Belfast as well as Consultant in Restorative Dentistry to the Royal Hospitals from 2000 - 2010. He also served as the Consultant Editor of Gerodontology, as well as the Treasurer and Secretary to GORG, IADR and Editor of the GORG IADR newsletter.

Professor Lynch has served as Senior Lecturer in Conservative Dentistry and Hon. Consultant in Restorative Dentistry and Postgraduate Course Organiser for the University of London where he was full time for 20 years (1980 - 2000).

Professor Lynch has been awarded more than 100 research grants, totalling over 6 million pounds and has more than 620 publications, including chapters in books and refereed abstracts. During his career, he has successfully supervised over fifty MSc, MPhil and PhD students and has been awarded several prizes for his research.

### Learning Outcomes

- dental crowns in one visit - "one visit crowns"
- understanding the latest research behind how much caries removal is needed in deep cavities
- the latest ways to avoid post-operative sensitivity with posterior composites
- ideal placement techniques for posterior composites
- clinical relevance of direct composite "crowns"
- using the latest methods to manage deep carious lesions
- understanding when to use glass ionomer cements
- understanding how to reduce the need for root canal treatments when dealing with almost cariously exposed teeth
- understanding how to manage pulpal exposures using the latest techniques
- understanding the latest ways to improve your success for Root Canal Treatment
- understanding how minimal invasive dentistry should be applied in dental practice
- learning when to use silver fluoride
- learning when to use ozone
- current applications to improve tooth whitening
- practical approaches to internal bleaching on a discoloured tooth
