INSTRUCTIONS FOR USE

POLA OFFICE+

INSTRUCTIONS FOR NON-VITAL TOOTH WHITENING:

1. Select appropriate candidate. Note: Not everyone is suitable for non-vital tooth whitening.
2. Patient must have good oral health.
3. Seal all exposed roots and restorations.
4. Acid etching before treatment is NOT recommended.
5. Pola Office+ will not lighten any restorative materials.
6. Do not use on patients with extremely sensitive teeth.
7. Mild discomfort in teeth during treatment can be a common side effect.
8. If patient experiences sensitivity during light curing, move the tip slightly away from the tooth.
10. Advise patient not to smoke, consume highly coloured, hot or cold drinks, or eat hard food for 24 hours.
11. Treat any post-operative sensitivity with a desensitising gel or a desensitizer.
12. Remove Gingival Barrier by lifting it from one end.
13. A patient consent form is available for download at www.sdi.com.au

PRODUCT PRECAUTIONS:

1. Do not use on pregnant or lactating women.
2. Do not use any persons having known peroxides or bleaching products (e.g. whitening toothpaste, toothpaste, mouthwash) within 2 weeks prior to treatment.
3. Do not use on patients with translucent teeth or in the presence of any other bleaching agents.
4. Do not use Pola Office+ on any persons having known peroxides or bleaching products (e.g. whitening toothpaste, toothpaste, mouthwash) within 2 weeks prior to treatment.
5. Do not use Pola Office+ gel to come in contact with skin, eyes, or mucous membranes.
6. Do not allow Pola Office+ gel to come in contact with skin, eyes, or mucous membranes.
7. Patient must wear protective eyewear.
8. Operators must wear gloves, mask and protective eyewear.
9. Anyone with a history of chemical allergies is advised to undergo a sensitivity test.
10. Do NOT anaesthetize patient.
11. Do not remove syringe from wrapper until ready to use - syringes may be under pressure.
12. Do not recap un-used material in syringe, as contamination of the two gels will render Pola Office+ unstable.

STORAGE AND HANDLING:

1. MSDS available at www.sdi.com.au or contact your regional representative.
2. Keep out of reach of children.
3. Do not use on persons having known peroxides or bleaching products (e.g. whitening toothpaste, toothpaste, mouthwash) within 2 weeks prior to treatment.
4. Do not remove syringe from wrapper until ready to use - syringes may be under pressure.
5. Single use only - do not recap un-used material in syringe, as contamination of the two gels will render Pola Office+ unstable.
6. Do not use on patients with extremely sensitive teeth.
7. Patient must wear protective eyewear.
8. Operators must wear gloves, mask and protective eyewear.
9. Anyone with a history of chemical allergies is advised to undergo a sensitivity test.
10. Do NOT anaesthetize patient.
11. Do not remove syringe from wrapper until ready to use - syringes may be under pressure.
12. Do not recap un-used material in syringe, as contamination of the two gels will render Pola Office+ unstable.
