

SDI RIVA STAR AQUA

INSTRUCTIONS FOR USE (CAPSULES)

Riva Star Aqua is an ammonia free new generation desensitiser that immediately relieves tooth sensitivity.

INDICATIONS FOR USE:

Desensitising cervical tooth hypersensitivity.

CONTRA-INDICATIONS

Do not use on patients undergoing thyroid gland therapy, who have a history of chemical allergies such as silver, fluoride, potassium and iodine. Note: If in doubt, consult a doctor or an allergy specialist before use.

PROCEDURE

1. Using a non-fluoride prophylaxis paste in a rubber cup, clean the tooth/teeth to be treated and abutting teeth.

2. Assess condition of teeth. Only teeth with sound dentine and enamel should be treated.

3. Isolate area to be treated using cotton rolls.

4. Protect any exposed gingival tissues and lips with petroleum jelly/ coca butter taking care not to contaminate treatment site.

5. **Riva Star Aqua Step 1:** Using the **silver blue** brush provided, pierce through the foil of the **silver blue** capsule and carefully apply solution to treatment site only.

6. **Riva Star Step 2:** Immediately after, use **green** brush provided, pierce through the foil of the **green** capsule and apply a generous amount of solution to treatment site until the **creamy white precipitate turns clear** (if this precipitate does not turn clear staining may result).

Note: Apply same solution from **green** capsule to any other tooth surfaces that may have come into contact with the solution from the Riva Star Aqua Step 1 **silver blue** capsule.

7. Blot dry.

8. Remove all protective/isolation materials used in the mouth.

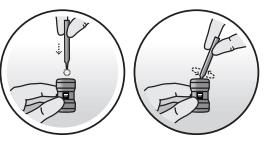

9. Discard used capsules and brushes in accordance with local regulations.

DOSAGE:

• Each Riva Star Aqua Step 1 and Step 2 capsule can treat up to 5 teeth per patient.

• Limit of one (1) Riva Star Aqua Step 1 and one (1) Step 2 capsule per visit. If needed a second application of Riva Star Aqua may be administered after 1 week.

Fig.1 How to pierce capsule

1. Use colour coded brush to pierce foil on capsule.

2. In a circular motion, push foil to the edge of the opening.

PRECAUTIONS:

• For professional use only.

• Do not repeat treatment on pregnant or lactating women.

• Patient must be informed of potential staining prior to treatment.

• Avoid contact of Riva Star Aqua Step 1 solution (**silver blue** capsule) with oral soft tissue, eyes and skin. If accidental contact occurs, refer to "FIRST AID" below.

• Avoid contact of Riva Star Step 2 solution (**green** capsule) with eyes.

• Do not desensitise teeth with soft dentine as staining may occur.

Note: If it does occur, stained sites can be reduced by using a judicious polishing procedure with phosphoric acid impregnated pumice powder and then polished with a self-cure glass ionomer cement (such as Riva Self Cure, SDI Limited).

• Keep out of reach of children.

• Do not ingest.

• Riva Star Aqua Step 1 Solution (**silver blue** capsule) will stain (see "HANDLING STAINS").

• Wear gloves and eye protection when handling.

• Single use only.

• Do not use after expiry date.

• Caution: Federal Law restricts this device to sale by or on the order of a dentist.

• Riva Star Aqua Step 1 Solution (**silver blue** capsule) contains 0.06g / ml. fluoride ions.

• SDS is available at www.sdi.com.au or contact your SDI representative.

STORAGE AND HANDLING:

• Do not pierce foil of Riva Star Aqua **silver blue** capsule or **green** capsule until ready to use.

• Store in a cool and dark place at temperatures between 2° and 25°C (35° - 77°F).

• Use at room temperature between 20° and 25°C (68° - 77°F).

FIRST AIDS:

• **Eyes (contact):** Hold eyelids apart and flush the eye continuously with running water. Continue flushing until advised to stop by a Poisons Information Centre (Australia, 131 126) or a doctor, or for at least 15 minutes.

• **Skin/oral soft tissue (contact):** Remove contaminated clothing, flush area with running water (in case an eschar is formed, this should disappear within 24-48 hours).

• **Ingestion:** Not expected due to dose volume. If affected, do NOT induce vomiting. Give a glass of milk or water. For advice contact a Poisons Information Centre or a doctor.

• **Inhalation:** Not expected due to dose volume. If affected, remove from contaminated area.

HANDLING STAINS:

• **Skin:** In case of skin contact with Riva Star Aqua Step 1 (**silver blue** capsule), apply Riva Star Step 2 (**green** capsule) with gentle rubbing. Skin will slowly disperse. Otherwise, if Riva Star Step 2 is not applied, the stain should disappear gradually after a few days.

• **Clothing:** Remove contaminated clothing and soak in Napisan® (or other fabric stain remover) overnight and wash per normal.

• **Hard surfaces:** Immediately apply household bleach (sodium hypochlorite) then wipe off with water. For stubborn stains, saturate a paper napkin with household bleach and place over affected area. Leave overnight and mop up with water.

Napisan® is not the registered trademark of SDI Limited.

PACKAGING:

Each Kit contains:

- 10 x Riva Star Aqua Step 1 (**silver blue** capsule)

- 10 x Riva Star Step 2 (**green** capsule)

- Accessories

SWE DISH RIVA STAR AQUA

Riva Star Aqua is een ammoniakvrije desensibilisator van de nieuwe generatie die de gevoeligheid van de tanden onmiddellijk verlicht.

INDICATIES VOOR GEBRUIK

Desensibilisieren van cervical tandovergevoeligheid.

CONTRA-INDICATIES

Niet gebruiken bij patiënten die een schilddiktervering volgen, die een geschiedenis hebben van chemische allergieën zoals zilver, fluoride, kalium, jodium, ammoniak en methacrylaten.

Opmerking: In geval van zwijfels, raadpleeg dan voor gebruik een arts of een allergiespecialist.

PROCEDURE

- Gebruik een niet-fluoride profylaxe pasta in een rubberen beker, reinig de te behandelen tand/tanden en aangrenzende tanden.
- Beoordeel conditie van tanden. Alleen tanden met gezond dentine.
- Isolier het te behandelen gebied met wattenrollen.
- Bescherm eventueel blootliggend tandvlees en lippen met vaseline / cacaoboter / boterkoek en zorg ervoor dat het te behandelen gebied niet wordt verontreinigd.

Riva Star Aqua Step 1: Prik met behulp van de meegeleverde applicator door de folie van de **zilver/ blauwe capsule** en breng allemaal de oplossing zorgvuldig aan op het te behandelen gebied.

Riva Star Aqua Step 2: Gebruik direct daarna de **groene** meegeleverde applicator, prik door de folie van de **groene capsule** en breng een royale hoeveelheid van de oplossing aan op het te behandelen gebied **totdat de romige witte oplossing helder is**, als de oplossing niet helder wordt, kan dit vlekken veroorzaken).

Opmerking: Breng dezelfde oplossing aan op elk ander tandopervlak welke in contact is gekomen met de oplossing als omscreven in stap 1. **zilver/blauwe capsule**.

7. Druk op de capsule.

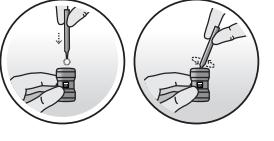

8. Verwijder alle beschermende / isolatiematerialen die in de mond werden gebruikt.

9. Gooi gebruikte capsules en applicators weg overeenkomstig met de plaatselijke voorschriften.

DOSERING

- Met elke Riva Star Aqua Step 1 en Step 2 capsule kunnen maximaal 5 tanden per patiënt behandeld worden.
- Maximaal één (1) Step 1 en één (1) Step 2 capsule per afspraak. Indien nodig, een tweede behandeling van Riva Star Aqua kan na 1 week worden gemaakt.

Fig.1 Op welke wijze de folie te doorbreken:

- Gebruik de kleurgecodeerde applicator om de folie van de capsule te doorbreken.
- Schuif de folie naar de rand van de opening in een rotende beweging.

VOORZORGSMIDDELGREGELS

- Alleen voor professioneel gebruik.
- Vanwege mogelijke verkleuring is het aanbevolen dat de voortanden niet worden behandeld.
- Patiënten die voorafgaand aan de behandeling gewezen worden op mogelijkheid van allergieën.
- Vernijd contact met slijmvlies, ogen en huid met de oplossing van de **zilver/blauwe capsule**. **Riva Star Aqua step 1:** Indien per ongeluk contact wordt gemaakt, verwijder dan eerst Hulphier hieronder beschreven.
- Vernijd contact met de ogen met de oplossing van de **groene capsule** (stap 2)
- Tanden met gevoelige dentine niet desensibiliseren vanwege mogelijk effect van verkleuring. **Opmerking:** Indien verkleuring optreedt behandel gebied met fosforaat geimpregneerd puimsteenpoeder en breng een heel uithardend glas ionomeer cement aan (zoals Riva Self Cure van SDI Limited).
- Prik alleen op kinderen houden.
- Niet innemen.
- Oppassing van **zilver/blauwe capsule** (Riva Star Aqua step 1) verkleurd (zie "Behandelen van vlekken").
- Draag handschoenen en bescherm ogen bij gebruik.
- Enamalig gebruik.
- Niet gebruiken na vervaldatum.
- Let op: Volgens lokale wetgeving mag dit product uitsluitend door of in opdracht van een tandarts worden verkocht.
- Oppassing van **zilver/blauwe capsule** (stap 1) bevat 0,06 g / mL Fluoroïden.
- VIB is beschikbaar op www.sdi.com.au of neem contact op uw SDI vertegenwoordiger.

OPSLAG EN HANTERING

- Doorbaar de folie van de Riva Star Aqua **zilver/blauwe capsule of groene capsule** indienbaar voor gebruik.
- Bewaar op een koele en donker plek bij een temperatuur tussen 2 ° en 25 ° C (35 ° - 77 ° F).
- Gebruik bij kamertemperatuur tussen 20 ° en 25 ° C (68 ° - 77 ° F).

ERSTE HULP

- Ogen (contact):** Houd de oogleden uit elkaar en spoel continu met stromend water. Blif spoelen tot een vergiftigingen Informatie Centrum of een arts, het advies gevraagd te stoppen, of gedurende ten minste 15 minuten.
- Huid / oraal zaach weefsel (contact):** Verwijder besmette kleding, spoel het gebied af met stromend water (in het geval een korst wordt gevormd, dit verdwijnt binnen 24-48 uur).
- Inslikken:** Niet te verwachten vanwege dosis volume. Indien aangetast, breken NIOT opwekken. Geef een glas melk of water. Neem voor advies contact op met een vergiftigingen centrum of een arts.
- Inademing:** Niet te verwachten vanwege dosis volume. Indien aangetast, verwijder van verontreinigde omgeving.

BEHANDELING VAN WEKKEN

- Huid:** In geval van aanraking met de huid met Riva Star Aqua Step 1 (**zilver/blauwe capsule**) breng de oplossing uit Riva Star Aqua Step 2 (**groene capsule**) aan met zacht wrijven.

Vlek zal langzaam verdwijnen. (Als er niets wordt gedaan zal de vlek na een paar dagen geleidelijk aan verdwijnen).

Kleding: Verwijder de verontreinigde kleding. Overnaden inwijken met Napisan* (of andere vlekkenverwijderaar geschikt voor stof) en normaal waschen.

Harde oppervlakken: Breng onmiddellijk bleekwater aan (natrium hypochloriet) daarna afvegen met water. Voor hardheden vlekken, dompel een papieren servet in bleekwater en plaatst over het getroffen gebied. Een nacht laten staan en dwelen met water.

Napisan* is geen geregistreerd handelsmerk van SDI Limited.

VERPAKKING

Elke verpakking bevat

- 10 x Riva Star Aqua Step 1 (**zilver/blauwe capsule**)
- 10 x Riva Star Step 2 (**groene capsule**)
- Accessoires

Amerikaanse patenten verleend.
