

RIVA APPLICATOR PRO

CAPSULE APPLICATOR

EASY.
STRONG.
CLEAN.

EASY. STRONG. CLEAN.

The Riva Applicator Pro is a durable, universal capsule applicator designed for dentists. Compatible with SDI and other market leading glass ionomer capsules¹, its advanced lock system provides reliable extrusion. Featuring an ergonomic, maintenance-free design, the applicator withstands drops up to 1.5 meters² and requires no lubrication. Fully autoclavable³ and easy to clean, maintaining a professional, hygienic appearance. An essential tool for modern dental practices.

EASY. STRONG. CLEAN.

The Riva Applicator Pro represents SDI's third generation of applicators, setting a new standard in compatibility, reliability, and hygiene. Designed for seamless use and high performance, it makes extruding capsules simple and easy.

CAPSULE COMPATIBILITY

The Riva Applicator Pro features an advanced capsule lock system compatible with all SDI glass ionomers, SDI Stela capsules, and other market leading glass ionomer capsules¹. Capsules lock securely in place, ensuring consistent and reliable extrusion.

DURABLE AND LONG-LASTING DESIGN

Engineered for longevity, the Riva Applicator Pro boasts a sleek ergonomic design that minimises sharp edges and potential ingress points. Its durable internal steel mechanics require no lubrication, maintaining reliability over time. Built to withstand the rigors of daily use.

HYGIENIC AND EASY TO CLEAN

Cleaning the Riva Applicator Pro is easy. It is fully autoclavable, ultrasonic bath tolerant.³ This ensures the applicator remains hygienic and professional-looking with minimal effort.

FEATURES

- Compatible with SDI and other market leading glass ionomer capsules¹
- Contoured design for strength and comfort
- Engineered stainless steel mechanical parts and durable mechanical casing
- Autoclavable and ultrasonic bath tolerant³
- No lubrication required
