SENSITIVITY ELIMINATOR

A STAR PRODUCT CONTAINING THREE POWERFUL COMPONENTS:

\[ \text{Ag}^+ \quad \text{SILVER} \]
\[ \text{I}^- \quad \text{IODIDE} \]
\[ \text{F}^- \quad \text{FLUORIDE} \]

TWO YEARS AND BEYOND DESENSITISING EFFECT
A clinical study supports the immediate effect after one application with Riva Star. Desensitisation lasts at least 2 years.

PATENDED PROCEDURE
Unlike other silver fluoride systems, Riva Star’s two step patented procedure minimises the risk of staining. By applying the potassium iodide solution over the silver fluoride, a silver iodide creamy white precipitate is formed and then turns clear.

TOOTH DESENSITISING AGENT

A DESENSITISING STAR OFFERING IMMEDIATE RELIEF
The silver fluoride and potassium iodide action in Riva Star blocks the microscopic tubules that make up dentine. A low-solubility precipitate is formed that gives instant relief. It acts by preventing the flow of fluid that produces sensitivity.

INDICATIONS
Desensitising cervical tooth hypersensitivity.

OTHER BENEFITS
Riva Star is essential for clinicians practising minimally invasive dentistry. It conditions dentine and may assist tooth preservation.

INCREASING BOND STRENGTHS OF GICS
Pre-treating tooth surfaces with Riva Star is a great way to enhance bonding of glass ionomers to dentine.

INDICATIONS
Desensitising cervical tooth hypersensitivity.
**INSTRUCTIONS**

1. Clean teeth with prophy paste and isolate area with cotton rolls.

2. Dry area and apply a small amount of gingival capitol G and B barrier to adjacent tissue.

3. Light cure in a fanning motion.

4. Using silver brush, pierce foil on silver capsule. In circular motion, push foil to the edge of the opening.

5. Carefully apply solution from silver capsule to treatment site only.

6. Immediately using green brush, pierce foil on green capsule. In circular motion, push foil to the edge of the opening.

7. Apply generous amount of solution from green capsule to treatment site. Keep applying until creamy white turns clear.

8. Blot dry, remove gingival barrier.

**CAUTION:** The material could stain teeth if incorrectly used. Patient must be informed of this risk prior to its use.

**ORDER DETAILS**

**RIVA STAR**

Riva Star Kit
- 10 x Riva Star Step 1 Silver Capsules
- 10 x Riva Star Step 2 Green Capsules
- 2 x 1mL Gingival Barrier syringes
- Accessories

**RIVA STAR**

Riva Star Bottle Kit
- 1 x 1.5mL Riva Star Bottle Step 1
- 1 x 3.0mL Riva Star Bottle Step 2

**INSTRUCTIONS**

1. Carefully apply solution from silver capsule to treatment site only.

2. Immediately using green brush, pierce foil on green capsule. In circular motion, push foil to the edge of the opening.

3. Apply generous amount of solution from green capsule to treatment site. Keep applying until creamy white turns clear.

4. Using silver brush, pierce foil on silver capsule. In circular motion, push foil to the edge of the opening.

5. Blot dry, remove gingival barrier.

**CAUTION:** The material could stain teeth if incorrectly used. Patient must be informed of this risk prior to its use.
