

# The Newest Addition to the Pola Range

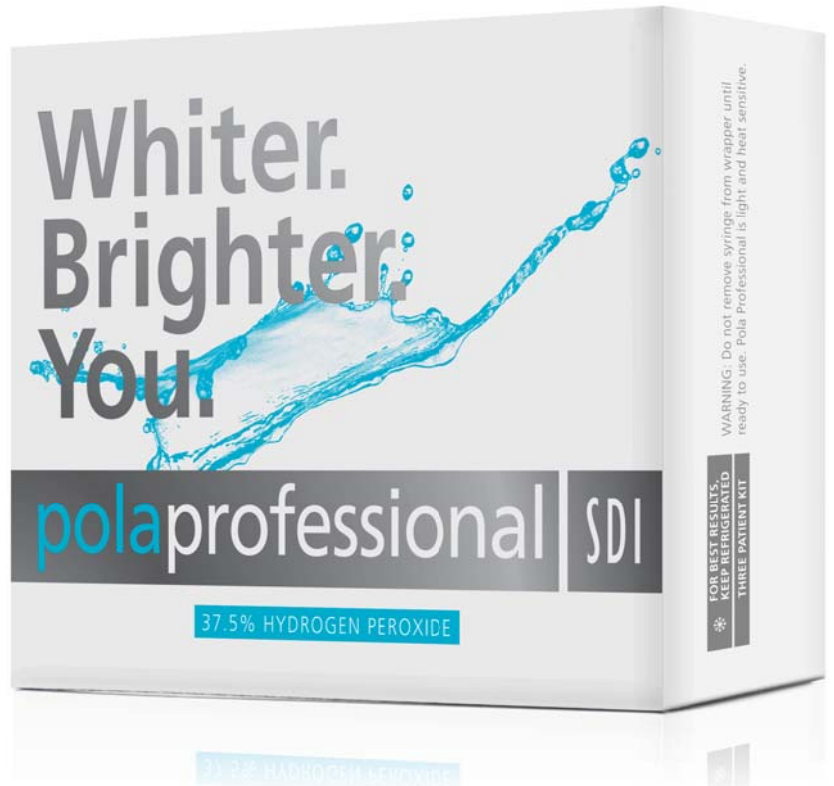

## Pola Professional

Pola Professional is a hydrogen peroxide whitening system designed to medically bleach endodontically treated teeth. Using the "walking bleach" technique, Pola Professional provides an easy and reliable whitening system for non-vital tooth bleaching.

- Extremely fast application
- 1 and 3 patient kits

Pola Professional is available with 2 different delivery systems to suit your needs:

1. **Dual Barrel – Auto mixed direct delivery**
2. **Powder Liquid – Operator mixed & applied**

37.5%  
HYDROGEN PEROXIDE

### Dual Barrel - Auto Mixed Direct Delivery

The automix system offers significantly shorter prep time, freshly activated gel as needed and a convenient direct and precise application.

CHOICE  
OF

35%  
HYDROGEN PEROXIDE

### Powder Liquid - Operator Mixed and Applied

Once mixed, the powder and liquid forms a bright blue foam like gel which is non-sticky and non-stringy, making placement inside the open pulp chamber easy.
