THE NEXT GENERATION SDF SYSTEM

Riva Star Aqua is a non-invasive 2 step patented system used to desensitise tooth pain. This next generation water based solution is not only antimicrobial, it is also a bio film eliminator and a powerful desensitiser.

Compared to **Riva Star SDF**, **Riva Star Aqua** is water-based [not ammonia-based]. This reduces tissue irritation, eliminates odours and poor taste, while improving storage stability.

TWO STEP PROCESS:

Step 1: AgF applied to treat the tooth

Step 2: Potassium iodide applied to reduce staining

AGF ACTIVE INGREDIENTS INCLUDE:

Silver: To help kill bacteria

Fluoride: To help remineralise teeth

Water: To help eliminate soft tissue burns upon contact

KI ACTIVE INGREDIENTS INCLUDE:

Potassium iodide: Applied to reduce staining
